Summary

Currently I'm enrolled at Ozark Community College in the AAS.CIS program. I will graduate in spring of 24.

I work with embedded systems, game development, web development and bot/automation.

Current projects include:

Wireless access point monitoring system with gps tracking that sends data to server to display a heat map of the network area to help spot dead spots.

Portfolio website to showcase my work, using Github as a CI/CD pipeline and AWS as the host.
